PROFESSIONAL PROFILE

Software Engineer focused on building modern web applications with Next.js, React and TypeScript, with an emphasis on architecture, accessibility, performance and maintainability.

Experienced in API integration, authentication, Supabase, server-state management, automated testing and frontend quality practices. Builds practical software projects while applying modern engineering approaches to testing, performance, accessibility and code quality.

Uses AI-assisted development tools to accelerate implementation while retaining ownership of architecture, technical decisions, validation, security considerations and final code quality.

TECHNICAL SKILLS

Languages

TypeScript • JavaScript (ES6+) • HTML5 • CSS3

Frontend

React • Next.js • React Router • Styled Components • Responsive Web Design • CSS Grid • Flexbox • Semantic HTML

Application & Data

React Query • Redux • Redux Toolkit • REST APIs • Fetch API • Supabase • Authentication • Database Integration • Multi-Tenant Application Architecture

Testing & Quality

Playwright • Lighthouse • Web Performance • Core Web Vitals • Accessibility / WCAG • TypeScript Validation • ESLint • Bundle Analysis

Engineering Practices

Component Architecture • Reusable Components • API Integration • Git • GitHub • Pull Requests • Code Reviews • Performance Optimisation • AI-Assisted Development

SELECTED SOFTWARE PROJECTS

WTM-Music

AI Music Generation Web Application

Technology: Next.js • TypeScript • React • Supabase • Styled Components • React Query • Kie.ai / Suno API

Developing a multi-tenant web application for AI-assisted music generation, combining modern frontend architecture with authentication, database-backed application state and asynchronous external services.

- Building the application with Next.js App Router, React and TypeScript.
- Developing reusable interfaces using styled-components and structured component architecture.
- Implementing authenticated and tenant-aware application workflows.
- Using Supabase for application data and database-backed functionality.
- Integrating external AI music-generation services through asynchronous API workflows.
- Designing credit management around tenant-level balances and immutable transaction records.
- Using React Query for server-state management and data synchronisation.
- Designing generation workflows around task tracking, result handling and asynchronous processing.
- Implementing validation, authentication and error handling across application workflows.
- Applying security, performance, accessibility and maintainability principles throughout development.
- Using AI-assisted development tools while retaining responsibility for architecture, technical decisions, validation and final implementation quality.

Front-End Developer Portfolio

React • JavaScript • Styled Components • HTML5 • CSS3 • GitHub Pages

Personal software-engineering portfolio demonstrating frontend development, responsive UI implementation and ongoing engineering-quality improvements.

- Built a responsive React application using reusable components and structured feature organisation.
- Implemented responsive layouts using CSS Grid, Flexbox and modern CSS techniques.
- Applied semantic HTML and accessibility principles.
- Organised frontend assets and reusable UI primitives with maintainability in mind.
- Used Git and GitHub throughout development.
- Audited and continuously improving the application using Lighthouse, Playwright, TypeScript checks, accessibility analysis and bundle/performance evaluation.
- Continuously reviewing architecture, assets and implementation quality for maintainability and performance.

Live Portfolio:

https://boostertech.github.io/Software_Engineer_Portfolio/

MovieBrowser

React • JavaScript • REST API • HTML5 • CSS3

Collaborative frontend application developed as part of the YouCode Front-End Development programme.

- Built a React application consuming external movie data through a REST API.
- Developed reusable React components and responsive user interfaces.
- Worked collaboratively within a shared codebase using Git and GitHub.
- Participated in pull requests and code reviews.
- Contributed to task organisation, team meetings and Agile-inspired planning.
- Applied React, JavaScript, HTML, CSS and API integration in a collaborative development workflow.

PROFESSIONAL EXPERIENCE

Usher Insulations

Crew Leader / Truck Driver

2021 – August 2026 | Ireland

- Led teams and coordinated day-to-day site activities in a safety-focused operational environment.
- Managed scheduling, logistics, equipment and changing priorities.
- Coordinated work activities while maintaining safety and operational requirements.
- Developed strong leadership, planning, problem-solving and operational decision-making skills.

Trim Castle Hotel

Food & Beverage Assistant

2011 – 2021 | Ireland

- Provided customer service in a busy hospitality environment.
- Worked effectively within teams while maintaining service and quality standards.
- Developed strong communication, organisation and attention-to-detail skills.

The Station House Hotel

Banqueting Supervisor

2005 – 2011 | Ireland

- Supervised banqueting operations and coordinated event setups.
- Coordinated team members and client requirements.
- Managed multiple tasks and changing operational priorities.
- Developed leadership, organisation and customer-facing skills.

Cukry Nyskie Ltd

Assistant Computer Technician

2003 – 2005 | Poland

- Assisted with computer and network infrastructure maintenance.
- Supported troubleshooting of technical and connectivity issues.

- Assisted with computer systems and technical support activities.
- Developed practical experience in networking, computer systems and technical problem-solving.

EDUCATION & CERTIFICATIONS

YouCode

Front-End Development | 2023 – 2024

Distinction

Front-end development programme covering modern JavaScript, React, HTML, CSS, Git/GitHub and collaborative software development.

Fitzwilliam Institute, Dublin

Computer Science / IT Specialist | 2014 – 2016

95% result

C++ Institute

Associate Programmer Certification | 2015

83% / Distinction

University of Applied Science, Nysa, Poland

Computer Science studies | 2003 – 2007

LICENCES

Full Driving Licence — Categories B and C

Private Pilot Licence (PPL)
